TECHNICAL SKILLS

Programming Languages

Python, C, C++, JavaScript

Web Development

Django, Django REST Framework, Flask, React, HTML, CSS

Databases

SQL, MySQL, SQLite

AI & Machine Learning

Machine Learning, TensorFlow, MediaPipe

Generative AI

Large Language Models (LLMs), Prompt Engineering

Development Tools

Git, GitHub, VS Code, Jupyter Notebook

LANGUAGES

- English
- Nepali

PROFILE

Computer Engineering student with a strong foundation in software development, data structures, algorithms, and system design. Experienced in developing full-stack web applications, RESTful APIs, and AI-based applications using Python, Django, React, and machine learning technologies. Interested in backend development, database management, and Generative AI.

EDUCATION

Bachelor of Engineering – Computer Science Jan 2024 – Oct 2028

Himalaya College of Engineering

Foundation in C++, C, Python, computer architecture, OS, and software engineering principles.

High School – Science Stream, Computer Science Jan 2021 – Dec 2023

Kathmandu Model Secondary School

Mathematics and computer science fundamentals in the Science stream.

COURSES & CERTIFICATIONS

GenAI & LLM Jun 2026

Broadway Infosys

Development of Generative AI applications using Large Language Models (LLMs), prompt engineering, and API integration.

Web Framework: Django Jun 2025

Broadway Infosys

Development of RESTful APIs using Django REST Framework for frontend and backend integration.

Web Development & Graphics Jun 2024

Skill Spark

Responsive web design using HTML, CSS, and JavaScript.

PROJECTS

PIX Cinema – Online Movie Booking System 2025

Personal Project

- Technologies: Django REST Framework, React, JavaScript, SQL
- Developed a full-stack movie ticket booking application with a Django REST Framework backend and React frontend.
- Implemented movie listings, seat selection, and booking management.
- Designed role-based interfaces for administrators, staff, and customers.
- Integrated QR-based payment functionality.

SignLearn – Real-Time Sign Language Learning System 2026

6th Semester Minor Project

- Technologies: Python, Django, Flask, TensorFlow, MediaPipe
- Developed a webcam-based sign language recognition and learning application supporting ASL, NSL, and number signs.
- Used MediaPipe to extract 21 hand landmarks for gesture recognition.
- Integrated machine learning-based sign classification with real-time webcam input.
- Implemented text and speech output to support communication assistance.

I consent to the processing of my personal data for recruitment purposes in accordance with applicable regulations.
